About

I am a Front-End Engineer skilled in building responsive and dynamic user interfaces for real-time applications. Skilled in HTML, CSS, JavaScript and Angular with a focus on delivering high-performance solutions. Passionate about creating efficient, user-friendly applications and continuously learning new technologies.

Education

Vasireddy Venkatadri Institute of Technology, B.Tech in Computer Science Aug 2019 – May 2023

- CGPA: 8.3/10.0
- **Coursework:** Data Structures & Algorithms, Object Oriented Programming(OOPS), Database Management System, Operating System

Experience

Associate Software Engineer, OSI Digital – Hyderabad July 2023 – Present
Onescan | Front-end Engineer | Angular 14

- Engineered a reusable front-end component, streamlining development processes and enhancing efficiency by 15%.
- Designed and implemented key features for the core mapping interface, enhancing user experience and functionality, including a dynamic text highlight feature in PDFs based on coordinates.
- Enhanced code efficiency and system performance by 20% through targeted optimizations and best coding practices.

Toray E-Invoice | Front-end Lead | Angular 18

- Led a team of 2 engineers in delivering a critical project ahead of schedule.
- "Elevated code quality by 40% through strict adherence to coding standards and best practices, enhancing overall project efficiency."

BBSI | Front-end Engineer | Angular 16

- Developed features and resolved critical bugs to improve the performance and stability of the application.
- Enhanced debugging skills, accelerating issue resolution in complex projects without impacting functionality, earning an appreciation award for efficiency.

Technologies

Languages: JavaScript, TypeScript, Java, Python

Technologies: HTML, CSS, MySQL, Cloud

Framework or Library: Angular, Bootstrap, Jest, Sprint Boot

Tools: Git, VS code, Eclipse IDE

Publications

Resilient Edge Detection Method for Significant Impulse Noise Mar 2023
Dr. G. Krishna Mohan, **N. Hemanth Kumar**
